**Potential competing interests:** No potential competing interests to declare.

About the tradicional medicine, I am not sure how widely used these herbal or traditional medicine products are, please provide a specific reference.

About the vector control, I do not think it is relevant to mention vector control in detail in the objective of this note.

Please clarify, "In a more scientific and objective way, CINVESTAV researchers have studied various common drugs with known antiinflammatory and antiviral properties." In a more scientific and objective way, CINVESTAV researchers have studied various common drugs with known anti-inflammatory

Finally, It seems to me that this note could benefit from a paragraph describing the opportunities and challenges of implementing clinical protocols to rigorously evaluate the usefulness of metformin and ezetimibe as antivirals.
