The topic is very interesting and may improve the classroom instructions. However, the author/s may consider the following suggestions to improve the study:

1. The presentation of the abstract must be improved. Kindly follow the format in writing the abstract such as the research design, methodologies, and findings.
2. Determine the research gap as well as to include more literatures in relation to the present study.
3. Give weight to the results and discussions since it is the meat of the research study.
4. The discussions must be back-up by literatures to support the claims of the researchers.
5. Use the APA format in the reference list.
