Review comments on the manuscript title: **Analysis of climatic parameters in the upper Awash River basin of Ethiopia**

## General comments

Better the title Analysis of climatic variables in the upper Awash River basin of Ethiopia

### 1. Abstracts

2. The author should summarize the abstracts in one paragraph
3. An abstract is a short form of a full manuscript that contains all sections of a paper, but your abstract only describes the results section. So, please address the full section of the paper in your abstract

### 4. Introduction

5. The messages in paragraphs one and two are similar.
6. The summarized way of the existing background research is very poor in the study research
7. The author conveys similar information to the readers

### 8. Materials and methods

9. What are your model selection criteria?

### 10. Results

11. Make all of your figures consistent and clear, rather than bold.
12. There is no need for a source for your own results
13. What is your Mann-Kendall test results and the model described in the method?

### 14. Discussion

15. Other works are not discussed in more detail in the discussion section.

### 16. Conclusion

17. Instead of summary and conclusion, say conclusion.

### 18. References

19. The authors should cite recent and relevant literature.
