**Potential competing interests:** No potential competing interests to declare.

## Abstract

The abstract should be organized systematically. It should begin with a brief introduction, objectives, methods, results and research findings, and a brief conclusion.

## Introduction

The background of the problem should be supported by quantitative and qualitative data from observations as a basis for research, and an explanation of the urgency of the research.

The novelty of the research has not been disclosed, so that the research basis used and the differentiating aspects of previous research are visible.

## Method

It is better if the research steps can be explained in detail, step by step, to know the factual process that will be carried out.
