The article titled "System and Method for One or More Extruders Using a Robotic Arm to Print a 3D Model" looks to be interesting research. My suggestions for potential improvements in the future are as follows: 0. What type of article is presented here? Please follow the suggestions for article structure. 1. Please update and add more recent reference articles. In order to be more relevant, please choose contemporary resources. 2. Please explain the measurement procedure in more detail. 3. Using robotic arms in 3D printing is well known; please make a clear statement and present the novelty in your work. 4. Please check the language style. 5. The conclusion paragraph is too short; please rewrite it. The conclusion should briefly give the main conclusions of the presented study.

I'm wishing you all the best in your future work!
