Anaplastic Large Cell Lymphoma, Lymphomatoid Papulosis-Like Histology

National Cancer Institute

Source

National Cancer Institute. *Anaplastic Large Cell Lymphoma, Lymphomatoid Papulosis-Like Histology*. NCI Thesaurus. Code C7200.

An anaplastic large cell lymphoma characterized by the presence of histopathologic features reminiscent of lymphomatoid papulosis. These features include the presence of Hodgkin-like cells in a background of acute and chronic inflammation.
