In this study, the author Real-World Efficacy of N95, Surgical, and Cloth Masks in Mitigating SARS-CoV-2 Respiratory Infections: A Comprehensive Comparative Study. The manuscript is well written. I believe this manuscript can be accepted in Reviews in Environmental Science and Bio/Technology with minor revision.

The comments on this manuscript are as follows

1. The specifications of the masks must be mentioned (porosity, pore size, numbers of pores,.....)
2. Please cite few articles to increase the modern manuscripts 2023.
  - Recent preventive methods to reduce the infection diseases by air distributions control
  - Performance evaluation of different texture material masks to reduce airborne infection
3. during writing the paragraph, it is preferable to arrange the manuscripts from oldest to newest to see the extent of progress (achievement).
4. Introduction section need to be enriched with some recent reports (2023).
5. English language need to be simple version
6. In the introduction, please stress and repeat your objectives clearly
7. Please write down the environmental conditions during the experiments.
