# EDQM-HC Combined Term Terminology

National Cancer Institute

## Source

National Cancer Institute. *EDQM-HC Combined Term Terminology*. NCI Thesaurus. Code C150105.

Terminology subset about single terms to describe a pharmaceutical dose form (or combined pharmaceutical dose form) and an item of packaging, either for the purpose of distinguishing between marketed products that differ only in the container or administration device, or where the item of packaging has special characteristics that are relevant to the use of the medicinal product.
