

# Review of: "Risk Factors and Predictors of Severe Acute Malnutrition Among 6-59 Months Children in Lumbini Province, Nepal: A Facility-Based Cross-Sectional Study"

R. G. Viveki

Potential competing interests: No potential competing interests to declare.

Title may be rewritten as

"Epidemiological determinants of severe acute malnutrition among 6-59 months children admitted in nutritional care centre: A cross sectional study"

Abstract needs to be concized with writing objective: To assess the epidemiological determinants of severe acute malnutrition among 6-59 months children admitted in nutritional care centres

Delete aim

In Conclusion, it is said that prevalence of SAM was found to be 34.9%.... It is wrong to say so as in the study has not assessed the prevalence data.. and no refrence is also mentioned

References no 22,23,26,27 etc are not written as per standard style
