New Anteroseptal Myocardial Infarction by ECG Finding

National Cancer Institute

Source

National Cancer Institute. *New Anteroseptal Myocardial Infarction by ECG Finding*. NCI Thesaurus. Code C102734.

An electrocardiographic finding of pathologic Q waves in leads V1 through V4, which is suggestive of myocardial infarction of the anteroseptal wall of the left ventricle and which is new compared to prior ECGs. (CDISC)
