1. Abstract needs minor improvement. Let it flow for better understanding and for high visibility of your paper after publication.

2. What is the major contribution to knowledge? What did you achieve on "Optimizing Wastewater Treatment Performance System and Achieving Greater Efficiency to Improve Water Quality for Sustainability — A Review"?

3. Contribution to knowledge, discussion of results and technical content of this work need drastic improvement.

4. What is the novelty in this research work? Please highlight them.

5. Work of various Methods for treating wastewater. Also compare various technology and identify best option for various types of wastewater

6. Figures and plates must be referred to in the text before inserting them.

7. Please rephrase part of your work to reduce the similarity index /plagiarism.

8. Improve on your discussion of results. Discuss in line with your objectives and literature review

9. Avoid general statements in your conclusion. Let us know cogent conclusion, inferences and contribution to knowledge.

10. Add recommendations that can assist further studies on this

11. Proofread your work properly. Remove all grammatical and editorial errors. All equations, figures and plates must be checked.

12. Kindly recheck that all references are properly cited and listed. Use recent references from 2019-2023
