The article satisfies key aspects relevant to research. Commendable work was done by the researcher to address the minor issues raised in the previous review. Sufficient background for the study is given. As pointed out previously, the conceptual framework is quite relevant given the nature of the study. The methods section addresses key aspects carried out over the research period, together with pointing out indicators observed. The results are described, explained, and discussed sufficiently by the author. Illustrations used are relevant and appropriate too. A conclusion on the research aspect is made on three scales - national, regional, and global.
