Review of: "The Future of Malaysian SMEs in the Digital Economy"

Ahmed Alhamami

Potential competing interests: No potential competing interests to declare.

1. The originality, which forms the foundation of academic research, has not been effectively conveyed by this study.
2. The methodology employed in this research does not align with the established standards of academic research.
3. Insufficient availability of previous studies as references for academic research may result in significant gaps that deviate from the intended research objectives.
4. The discussion and conclusions presented in this research do not sufficiently address the research objectives initially set forth by the researcher.
