Potential competing interests: No potential competing interests to declare.

1. The keywords are not clearly indicate the problem

2. The introduction section may be elaborated with problem statement and the key contributions

3. In the related works section, the authors should explain why are these methods related to the proposed method? Are these methods comparable to the proposed method? Do they have some issues so that improvement is needed?

4. As per your ROC curve explanation the AUC value of under-damping is better than the oversampling method, please justify it?

5. The author should compare with existing related work in terms of performance.

6. Conclusion and reference list can be improved.
