This paper is well written. But some of the areas need to improve. From my view point author(s) need to add the followings:

1. In the introduction author(s) could explain more about their motivation to do this research. It is not clear in the introduction the main reason and their contribution. Authors have to clearly mention their contribution towards literature.
2. In the section 2 they have to explain their points using some of the relevant paper. They have to give back up their arguments using previous literature.
3. Author(s) could use the following papers -

**Hasan, F.,** Hasan, Md. Z., and Islam, M. R. (2022). COVID-19 movement control effect on the socio-economy: evidence from Bangladesh manufacture industry. *International Journal of Critical Accounting* 12(6), 531-553

**Hasan, F.,** Islam, M. R., and Ishrat, F. (2022). COVID-19 Pandemic Impact on the Supply Chains of the UK-Based Multinational Manufacturing Companies. *Business Ethics and Leadership* 6(2), 44-67.

**Hasan, F.,** Bellenstedt, M.F.R. and Islam, M.R. (2023). The impact of demand and supply disruptions during the Covid-19 crisis on firm productivity. *Global Journal of Flexible Systems Management* 24(1), 87-105.

4. In the conclusion author(s) could explain their main take away from this paper in more details. as well more about their methodology.
