The authors have just stated the use of polyphenols of pomegranate and black tea in combating Covid -19 as per literature reports. They have not given their own critical view how these polyphenols inhibit SARS-COV- 2 3C like protease activity. They should give scientific evidence for this. Moreover , the authors do not have any paper published in this field . They can refer to one of our papers (RichaShukla et.al: Two pronged approach for prevention and therapy of covid-19 (Sars-CoV-2) by a multi-targeted herbal drug, a component of ayurvedic decoction; European Journal of Integrative Medicine april2021, volume 43, 101262, <https://doi.org/10.1016/j.eujim.2020.101268>)
