The discussion of ai,ml carried out in a nice manner. Still the study must incorporate the contents to answer the following queries.

1.What are the features from dataset considered for your analysis

2.How proposed system implemented

3.what is the improvement acheived over existing system quantitatively

4.how you managed over fitting and under fitting scenario

5.where is the overall system workflow or architecture

6.have you developed any algorithm

7.have you applied any statistical methods for performance analysis
