Potential competing interests: No potential competing interests to declare.

The work is undoubtedly interesting; however, it is necessary to address some observations:

1. Please review the correct spelling of scientific names, such as *E.coli*.
2. Clarify the problem statement and why it is important to carry out this research.
3. Add percentages/frequencies to figures.
4. Additional information should be added to the discussion section to better support the authors' findings.
