

Review of: "Using Artificial Intelligence to Guide Physicians in Making Fasting Decisions for Diabetics During Ramadan"

Elanangai Vadivel

Potential competing interests: No potential competing interests to declare.

Idea of the research is good.

Research paper should have different sections like Abstract, Introduction, Literature review, recent works in that field, proposed methodology, Research Gap, Conclusion, References.

In this paper, few sections were not clearly explained.

Limitations of the present work are not explained properly.

Proposed Methodology is not clear.

More recent references and more methodology results could have been compared and tabulated for better understanding.
