Potential competing interests: No potential competing interests to declare.

The paper is well-written except for a few typographical and grammatical errors. In the Methods section, cite the reference for the sample size determination formula. Further down in the same section, you have a sentence that reads .....categorized according to the category of risk scores..... [Do not use ...categorized according to the category.... You can either say; documented (or listed) according to the category of risk scores.....

OR

...categorized according to risk scores.
