Oncovax-ID/IL-2 Vaccine

National Cancer Institute

Source

National Cancer Institute. *Oncovax-ID/IL-2 Vaccine*. NCI Thesaurus. Code C2783.

A cancer vaccine consisting of a mixture of a murine lymphoma-derived idiotypic and interleukin-2 (IL-2) encapsulated in dimyristoylphosphatidylcholine liposomes. The use of a liposomal carrier confers immunogenicity to the naturally non-immunogenic idiotypic. (NCI04)
