# Histone H2A Type 1-B/E

National Cancer Institute

## Source

National Cancer Institute. *Histone H2A Type 1-B/E*. NCI Thesaurus. Code C162891.

Histone H2A type 1-B/E (130 aa, ~14 kDa) is encoded by the human H2AC4 and H2AC8 genes. This protein is involved in chromosome condensation.
