Endopeptidase Asp-N in Ammonium Bicarbonate Protein Cleavage Reagent

National Cancer Institute

Source

National Cancer Institute. *Endopeptidase Asp-N in Ammonium Bicarbonate Protein Cleavage Reagent*. NCI Thesaurus. Code C161882.

A protein cleavage reagent comprised of a form of the bacterial endopeptidase Asp-N in a solution containing ammonium bicarbonate that cleaves proteins into peptides at the N-terminal side of an aspartate or glutamate residue.
