Potential competing interests: No potential competing interests to declare.

In general, it is an article with a topic of great interest, however, recent and relevant literature is not included. For example DOI: [10.1186/s12978-021-01293-7](https://doi.org/10.1186/s12978-021-01293-7).

Another comment is that the arguments become personal when there should be an overview of what is known regarding the access that LGBTQ+ have.

I suggest to expand the information and consider other non-personal aspects for analysis.
