Potential competing interests: No potential competing interests to declare.

The research has merit and is well documented

Title: clear and concise

Abstract: well captured

Introduction: precise and comprehensive with clear written English and good grammar

Materials and method: appropriate materials and methods were employed for the investigation

Results: results are well presented in tables and charts. The findings were clearly brought out and presented.

Discussion: All findings were well collaborated with already existing knowledge and new insight provided as regards the findings from the investigations, adding to body of knowledge on the subject matter

Conclusion: Relatable

I, therefore recommend this work for publication.
