Title: Synthesis and Antibacterial Screening of Cefradine Schiff Bases and Their Metal Salts

Dear Authors,

I recommend it to be ACCEPTED after revisions depicted as follows.

1. The introduction section should be enriched by using the latest reports.
2. Chemistry section: the spectroscopic results should be compared with the literature data, for both NMR and IR.
3. Similarly, "Biological Activity" section also should enriched by relevant comparisons with the previous reports.
4. After all revision, they should revise the References section.
