Potential competing interests: No potential competing interests to declare.

1. Can you specify the number of participants and their demographics in the quantitative research section of the abstract?
2. Preferably, a maximum of 5 keywords, and sorted alphabetically
3. No need to use too many statistical requirements tables; just a summary table of hypothesis results
4. Make sure the values in the table are the same in this figure
5. Make sure that in the conclusion of the research, this variable showed no significant influence on entrepreneurial intention
