Potential competing interests: No potential competing interests to declare.

Overall prospective of the article is good and relevant to the current scenario as viral infections are raising globally. I will provide stepwise correction to be made.

1. Abstract section: Keywords should be at least five.
2. In mechanism of action section, for better understanding to the reader, I recommend author to draw one image showing viral envelope disruption.
3. (3.2. Search Strategy and Data Sources): I suggests authors to mention the keywords they search on different database and how many articles they got on that section and how many they selected.
