This article entitled The Metaverse in Tourism and the Airline Industry is quite interesting to study, but there are several things that need to be perfected, namely:

1. The abstract should explain the research method used, whether qualitative, quantitative or mixed. Next, the results of the research that have been achieved are presented
2. In the Introduction section, there should be previous research related to the research or title above, so that in the last paragraph it is stated what the researcher's wishes are that are different from your research.
3. The methodology has not been described in the study
4. In part three of the Metaverse application, it is better to initiate a promotion mix because your research is related to introducing the application and how to use it and socialization.
