Manuscript Title: Exploring the Significance and Medicinal Potential of Rubus fraxinifolius: A Review of Ragimot Wildberry

Comment:

1. The title is not appropriate and comprehensive because it does not mention plant nutrition and cultivation.
2. The introduction is very boring.
3. It is better to divide the introduction into paragraphs according to the necessity and characteristics of the plant.
4. I suggest changing the subtitle (Functional properties).
5. Components of the section "Functional properties" are not appropriate.
6. This section is better divided into two parts: ethnobotanical uses; and pharmaceutical utilities.
7. For figures, it's better to include the entire plant, not just the fruits.
