Potential competing interests: No potential competing interests to declare.

* What are the limitations/recommendations?

* Introduction: very good section, however, authors should need to update this section with more recent examples and I suggest developing the Introduction chap. also based on some projects results/official reports.

* The research questions should be more developed.

* What does it add to the subject area compared with other published material?

* Make sure to discuss your Conclusions in relation to other international studies hypotheses.

*The connection between results and some research projects could also be approached this could lead to an interesting and policy-relevant discussion. The discussion section should be improved by citing further references from international researchers.

Overall, the manuscript displays an original work.
