Potential competing interests: No potential competing interests to declare.

I appreciate your research, but some things need to be improved:

1. Abstract meets the requirements.
2. Introduction It would be better to start from a larger context, and then focus on your research, presenting the gaps between previous studies and the research currently being carried out.
3. The author(s) needs to perform a validity test.
4. The results and discussion need to be expanded.
5. The conclusion section should conclude the paper.
