

Review of: "[Mini Review] Global Burden and Evolving Understanding of Hepatitis E Virus"

Giuseppe G.M. Scarlata

Potential competing interests: No potential competing interests to declare.

The article must be fully revised before it can be considered for publication.

The following points need to be addressed:

1. I believe the authors' intent is to write a narrative review, but the focus is not clear.
2. I suggest citing this paper: doi: 10.1016/j.prevetmed.2021.105448.
3. Need a thorough analysis of existing studies in the literature.
