

Review of: "Integration and Implementation of Multiple Soil Sensors for Automated and Regulated Irrigation"

Erukala Sudarshan

Potential competing interests: No potential competing interests to declare.

1. In Figure 2, there is no GSM module slot, which is important for updating the data on the server.
2. In Figure 24, "No" is not placed at the proper place in the flowchart, in contradiction.
3. It is necessary to explain how & which platform is used to interpret, analyze, and visualize the data with the help of the GSM module.
