# Rivastigmine Tartrate

National Cancer Institute

## Source

National Cancer Institute. *Rivastigmine Tartrate*. NCI Thesaurus. Code C47707.

The tartrate salt form of rivastigmine, a phenylcarbamate derivative exhibiting cognitive stimulating property. Although the mechanism of action has not been fully elucidated, rivastigmine tartrate may bind reversibly to cholinesterase, thereby decreasing the breakdown of acetylcholine and enhancing cholinergic function.
