

Review of: "Research of Competitive Pressure on Undergraduates' Intention to Study Abroad in Chinese Non-elite Universities"

Alisson Maehler

Potential competing interests: No potential competing interests to declare.

The article has a current and relevant theme, basically the motivators for Chinese students to study abroad. However, the research problem and objectives remain to be highlighted. The literature review is quite limited, with few articles analyzed. The hypotheses are well constructed, but the methodology could be further explained. For example, what are the criteria for selecting students for the sample? The analysis and discussion have little to do with theory. The results, however, are interesting.
