**Potential competing interests:** No potential competing interests to declare.

The content of the article is quite interesting. The author is complete in giving the idea of a technology product and making a product business plan. It is more suitable for a business project than an academic paper. In order for an academic article to be published, the author needs to consider including

1. Literature review
2. Research model
3. Implementation method
4. research results/research findings
5. Discussion
6. Limits of the study
