

Review of: "Investigation of Mechanical Properties of Sisal Fiber and Sugar Palm Fiber Reinforced Hybrid Composites"

Shumin Yang

Potential competing interests: No potential competing interests to declare.

In the Materials section, you should illustrate the materials you used and describe how you prepared these materials, rather than providing an introduction to the material.

In the results section, the aim is to convey the message of the figures in words and assist readers in comprehending the rationale behind the experiments and the significance of the results, rather than overwhelming them with an excessive amount of methods.
