

Review of: "A Study of the Urban Nightlife of Delhi and its Impact on Safety"

Stephanie Alejandra Madrid Solorza

Potential competing interests: No potential competing interests to declare.

The research is very interesting, it deals with the topic of nightlife, the vitality of the neighborhoods and its relationship with security through different sources, to make it more enjoyable for the reader I suggest the following:

1. I recommend restructuring the document with a classic format of: Introduction, Background (5. Regulations On Nightlife In Delhi), Theoretical Framework (Robert Williams, Jane Jacob and Oscar Newmann), Methodology (adding 3. Situating The Urban Nightlife in Indian Context, 4 Case Studies), Results (Safety Analysis and Findings), Discussions and/or Conclusions (Dialogue with the theories presented and answer the research questions).
2. Please have some data that refers to the official source to characterize the city of Delhi.
3. "(Gupta, n.d.)" Reference year missing
4. For research questions, avoid closed questions that are answered with yes or no, or with "improve" or "threaten."
5. Please delve into the methodology, what days was it applied? during what months of the year? in what schedule? In addition, a table with the characteristics of the total sample (case study, gender, age) and explain how the interview participants were chosen.
6. Please add the reference and explain a little more about what these parameters are, security and crime perspective?
7. Please check wording: ""(Williams, 2008) builds on the works of Henri Lefebvre in reference to "night time spaces" should be "Williams (2008) builds on the works of Henri Lefebvre in reference to "night time spaces""
8. The explanation of how the Likert scales work is in the methodology section.
9. Choose Table 3 or Table 2, they present the same information
10. There are references to documents, as well as phrases in quotes, without the corresponding citation
