Comments for The Role of Green Legacy in Promoting Sustainable

Development and Combating Climate Change

1. Add research method to the title.
2. Abstract is too long, the first few lines have to be shortened. 400 words will be maximum.
3. Some of the references are outdated; the authors may need to revise them.
4. The authors may discuss the research gaps and indicate what gaps this paper will fill in the introduction part.
5. The authors may need to make a brief introduction of the coming sections at the end of the introduction part.
6. The title "3. Research Methodology" may need to be changed to "Research methods" instead.
7. Logit model needs citation: <https://www.mdpi.com/2071-1050/12/7/2692>
8. Interview need citation: <https://link.springer.com/book/10.1007/978-981-10-5771-7>
9. table 1 may not be necessary; the authors could directly treat the content as several parts of the research methods part, and the left side content in Table 1 may be used as subtitles.
10. The authors may need to check the format of equations in research methods part.
11. Currently, it is recommended for the authors to separate the results and discussion part.
12. The authors should make a brief explanation with references for table 3.
13. The format of Table 4 may need to be further developed.
14. What is the meaning of 4.2? If qualitative analysis is necessary, more content may seem necessary.
15. The discussion part may need to be further expanded.
16. Section 7,8 may be moved to section 6.
