

Review of: "A Research Note on Natural Reclamation Processes that Support Mangrove Biodiversity Spheres: Sedimentation in Three Major River Deltas in Northwestern Luzon Using Aerial Imagery"

Yang Yunping Yunping Yang

Potential competing interests: No potential competing interests to declare.

1. Although the researchers know where the Philippines is, they recommend supplementing it with latitude and longitude information and giving its relative position on a global map.
2. The measurement means of remote sensing graphics in different periods are different, so is there enough uncertainty for the analysis results?
3. What is the dynamic mechanism by which mangroves promote sedimentation?
4. What are the implications of this study for global mangrove conservation?
