Chesapeake Bay Retriever

National Cancer Institute

Source

National Cancer Institute. *Chesapeake Bay Retriever*. NCI Thesaurus. Code C53869.

The Chesapeake Bay Retriever is a powerful, muscular retriever with a slightly wavy, rather short coat. Both the outer coat and dense wooly undercoat are oily for water-repellence. The coat comes in shades of brown, red or tan ranging from a dead-grass-straw color to a deep dark brown with red overtones. Height: 21-26 inches (53-66 cm.) Weight: 55-80 pounds (25-36 kg.)
