Potential competing interests: No potential competing interests to declare.

This study is about CSP and ORC cycle. This study needs to be improved. Some are listed below:

- 1- The list of nomenclature should be divided into four parts including parameters, subscripts, Greek symbols and abbreviations.
- 2- Figure 1 should be updated.
- 3- It is better to update literature review with new studies
- 4- The investigated system should be presented in a figure so that the reader can have a better view.
- 5- The reference of the equations is not clear.
- 6- Tables of constant parameters are incomplete and without references.
- 7- The study needs validation.
