Potential competing interests: No potential competing interests to declare.

1. Expand all abbreviations when they first appear in the manuscript.
2. The experimental procedures should contain actual weights.
3. The abstract is too long. I suggest the authors reduce it and put the essentials in this section.
4. What is the future scope of the present work?
5. All references should be checked carefully. The authors should use a uniform format for references.
6. Language needs polishing. A lot of grammatical mistakes.
7. The quality of some of the figures is low. Please correct.
8. The Conclusion section also needs to be rewritten. The conclusion should contain the significant findings of the work and discuss the main points that are avenues for future work.
