Eubacterium nodatum

National Cancer Institute

Source

National Cancer Institute. *Eubacterium nodatum*. NCI Thesaurus. Code C86387.

A genus of aerobic, Gram-positive, rod shaped bacteria assigned to the phylum Firmicutes. This species is nonmotile, non-spore forming, indole negative, reduces neutral red, and produces butyrate, but does not hydrolyze esculin or starch, digest gelatin, reduce nitrate, ferment carbohydrates, or produce hydrogen sulfide. *E. nodatum* was isolated from subgingival and supragingival samples in individuals with periodontal infections.
