Potential competing interests: No potential competing interests to declare.

Some recommendations to improve the manuscript

1. It is not necessary to mention the project team in the abstract.
2. The finding in the abstract was described too generally.
3. Suggest reporting more numbers or data regarding the study, instead of merely describing it in words. For example: how many interviewees, training hours, and so on.
4. Analysis of the ROI can be tabulated for clearer presentation.
5. How much was the electricity price sold to the community? How do you determine it was affordable?
