Potential competing interests: No potential competing interests to declare.

Paper title "[A Dataset of Small-Mammal Detections in West Africa and Their Associated Micro-Organisms](#)" commensurate with the delineated abstract.

The objectives of the research investigations has been well thought, quantifiable and specified.

Methodology has been clearly described and the period of research investigation has been mentioned. The data has been subject to statistical analysis by applying statistical test and the results have been explained and conclusion drawn in a nutshell.

In my opinion, the title and abstract and paper shows and meet potential of being regarded as fit for acceptance and publication.
