Potential competing interests: No potential competing interests to declare.

This manuscript provides a comprehensive exploration of the significance of the peat land conservation/restoration. topic, offering a detailed explanation and delivering a valuable message. However, there is room for improvement in terms of spelling, grammar, the use of technical jargon, and the introduction of abbreviations to enhance overall readability.

'from 5 cm to 12 cm have 05 plots; from 20 cm - 56 cm have 05 plots; from 86 cm - 92 cm have 05 plots (total 15 plots)."

sentence information could be merged and written better.

- Figure 1, 3: clarity to be improved and the legend of the figure to be included. and the angle view of the figure to be adjusted.

-Figure 2 and 5: the information should also be included in Table 1, and figure removed.

table 2: the total area is 3907m<sup>2</sup>, but earlier it was mentioned the surveyed plot area is 500m<sup>2</sup>? kindly clarify the projection / calculated approach.

This manuscript is well-crafted, offering comprehensive insights that I found both enjoyable and highly valuable. The information provided is not only useful but also presented in a clear and engaging manner.
