**Potential competing interests:** No potential competing interests to declare.

The author has submitted a manuscript entitled "Aligning Government Initiatives with Sustainable Development Goals: A Village-Level Mapping in India" that efficiently shows the relationship between various welfare schemes and SDGs at the village level in India. The author has done very good work and given proper justice to the research at the ground level. In my opinion, the research work needs justification on some points that are:

- 1 Justification in the methods used for sampling, sample population, and sample size.
- 2 There should be some latest research articles in the references as there are no research papers after 2020 in the list.
- 3 The Conclusion and Discussion sections should be separate.
- 4 In the conclusion section, the challenges are explained in bold for the first, second, and third challenges, but the fourth, fifth, and sixth challenges are not highlighted, please check.
