Dear Author and Qeios -

The topic is interesting to analyze, but, in my opinion, submitted manuscript is not a research paper. In fact, the Author doesn't introduce his work, doesn't provide a clear motivation of this research. In addition, a literature review is required. The methodology is a bit unclear, and Author must deeply follow the rule to write down a case study. In addition, the source of data must be declared, and all steps must be shown on the manuscript. The discussion and conclusion sections must be improved.

Best,

Gaetano Matonti
